

DN-1000F

Professional Single CD Player

The DN-1000F is a single CD player offering the same features and quality that have established the DN-2000F double CD player as an industry standard in the world of DJ mixing. The DN-1000F is also more affordable, and proves ideal for the following applications:

- DJs who work with two turntables but wish to add a CD player to their system to try mixing with CDs as well as vinyl.
- DJs already working with the DN-2000F/2700F who wish to add just one more drive to their system for enhanced mixing.
- Two DN-1000F players can be an alternative to a DN-2000F.

As an optional feature, DN-1000F equipped with an ID switch (Local, 1, 2). This allows one or two DN-1000F units can be operated by an optional RC-35 controller. In essence, two DN-1000F players and an RC-35 controller equal one DN-2000F.

Instant Start

Playback begins less than 0.01 seconds after the PLAY button is pressed. Only DENON provides real instant start.

TIME button

The TIME button switches the time display between elapsed time and remaining time.

CUE Button

The CUE button allows you to preview the beginning of a track. When you want to get back to the point where you pressed last in an instant, just press CUE. The song will be ready to start when the PLAY button is pressed. The CUE button can also be used to turn the CD player into pseudo sampler. Use SEARCH to "grab" the sound effect or phrase of your choice. Then press CUE. Each time you press the PLAY button, the effect will start instantly from where you cued.

PITCH button

Pitch Control can be turned off for 0% pitch by pressing "PITCH" button.

PITCH BEND

Once beats-per-minute of two tracks are matched with the Pitch Control, turn to the PITCH BEND to help you get the bass beats in sync. Press the + or - button to change speed momentarily. The longer you hold the button in, the more it changes. Releasing the button restores it back to the pitch speed set by the Pitch Control sliding fader. The PITCH BEND effect will not change the reference pitch set by the sliding fader.

19 inch Rack Mountable

One or two DN-1000F units can be operated via optional remote controller RC-35 (same as DN-2000F's one). For example, if you add one more DN-1000F and an RC-35 to your DN-1000F, you can control two DN-1000Fs via RC-35 like a DN-2000F system.

Dimensions and weight

482 (W) x 88 (H) x 62 (D) mm, 19 (W) x 3.5 (H) x 2.4 (D) inch
1.5 kg (3.3 lbs)

* RC-35 cannot be used for DN-2000F MK II.

Variable Pitch Range of ±8%

The long stroke sliding fader works just like the Pitch Control on a DN-2000F. The play speed of CD can be adjusted by ±8%.
