

Akai Professional MPK mini Plus

Importing an FL Control Script (v1.0)

Follow the instructions below to import the MPK mini Plus control script into FL Studio.

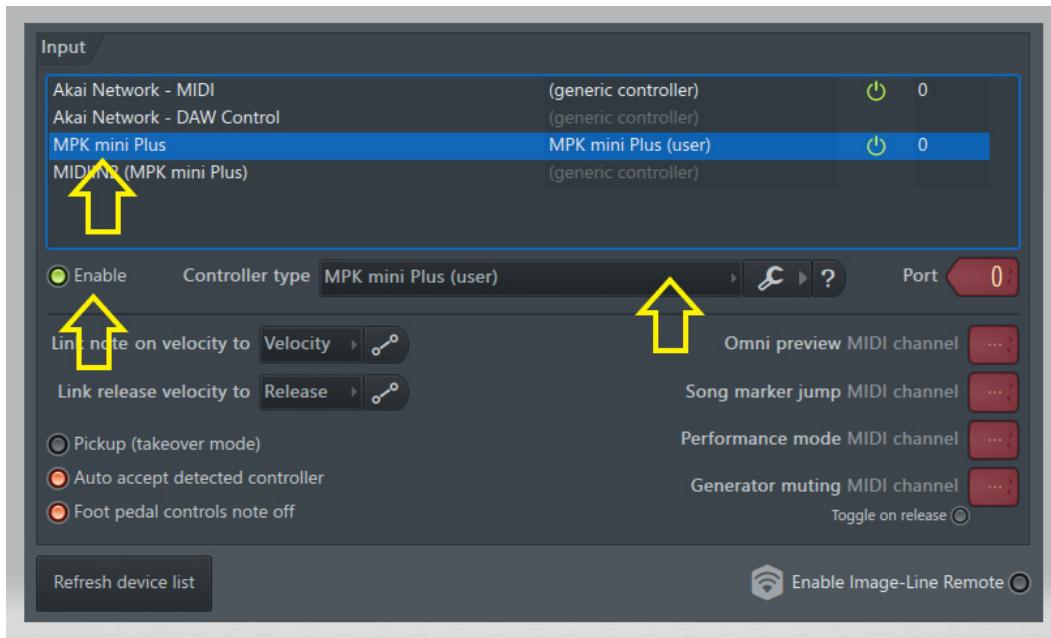

NOTE: This control script is intended for FL Studio 21 or later.

1. Download the **AKAI MPK Mini Plus.zip** file and then extract/unzip the folder.
2. Navigate to the following pathway on your computer:

macOS: *Documents\Image-Line\FL Studio\Settings\Hardware*

Windows: *Documents\Image-Line\FL Studio\Settings\Hardware*

3. Place the full, unzipped **AKAI MPK Mini Plus** folder in the **Hardware** folder.
4. Open FL Studio and then go to **Options > MIDI Settings**.
5. Under **Input**, enable **MPK mini Plus** and then select **MPK mini Plus (user)** under **Controller Type**.

6. That's it! Your MPK mini Plus is now mapped to control FL Studio.
