## v1.1 - Issued on 03-07-16

This update is recommended for all users.

Contains component firmware versions:

**Engine: 0143**

**MCU: 2061**

**Display: 8661**

### Changes/Improvements:

#### **Engine**

- Fixed issue where quickly flicking input switch from LN to Engine, to PC causes Serato library view to show on display.
- Fixed issue where right deck letter search was not working when turning select knob clockwise.
- Fixed issue where first letter search while in a playlist would cause Engine to freeze.
- Fixed issue where USB thumb drive was not accessible on power-up when inputs are switched from PC to Engine.
- Fixed edge case issue where screen becomes unresponsive while holding Shift + pitch fader and platter.
- Fixed issue where Shift + Platter rotation in both directions could sometimes cause track to stop playing.
- Fixed issue where Shift + Censor/Reverse did not activate reverse after pressing Censor/Reverse.
- Fixed issue where previous waveform data would sometimes appear for current track.

### **MCU**

- Fixed Ch Fader Start MIDI command for Serato DJ.
- Improved Cross fader contour smoothness.
- Improved Pitch Fader resolution.

### **Display**

No changes
