

Music Management Software

ENGINE for iPad[™]

Owner's Manual

How to connect your iPad using the engine application

(1) The diagram below describes the Wi-Fi router and system connection using DN-SC3900 Media players with an iPad.

(Refer to page15 of DN-SC3900 Owner's Manual)

- (2) Connect the USB storage device to either Media player.
- (3) Connect each Media player to the Wi-Fi network router with an Ethernet cable and make sure the router is powered on.
- (4) On the iPad, select the wireless router's network as the Wi-Fi network.
- (5) Power on the Media players. Please note that if you are using more than one Media player, be sure to set separate Network ID numbers per each player. (Refer to page 41 of DN-SC3900 Owner's Manual)
- (6) Tap the "engine" icon on the iPad screen to launch the engine application.

(7) The startup screen will display "engine". Tap where it says "Please Enter ConnectID" and enter an ID of your choice (you can use any voluntary 8-16 alphanumeric characters), then tap the Connect button.

(8) After the same Connect ID of step (5) is displayed on one of the DN-SC3900s, turn the Select knob to the right to display OK and press the knob in for ENTER to get started. Please note that you will only have to select the Connect ID on one DN-SC3900 if you have two or more connected.

(9) The Title list that is registered in the DB of the first listed USB device (which is connected to a media player) will be displayed.
