TOTAL PA GLOW 3

High-Power Bluetooth PA System with Lights

The ultimate in powerful PA sound and exciting lighting effects!

A wedding reception. A large business conference. The freshman science lecture hall. The Karaoke fundraiser you're putting on at the local pub.

These are just some of the venues that demand a no-excuses PA system that can cover a large area with powerful, articulate sound, but is easy to set up and flexible enough to handle a wide variety of inputs and auxiliary equipment. Looks like you need Total PA Glow 3.

Here is everything you need in an all-in-one PA system: A high-powered (500-watt) bi-amplified, equalized sound system driving a robust woofer and 1-inch tweeter covers even the largest spaces with clear, vibrant sound.

The woofer glows in multiple colors for exciting visuals, with a dazzling "circular motion" effect. It has a multi-channel mixer with two mic inputs and Master volume control. You can wirelessly stream music from any Bluetooth® device, use the built-in music player to read music files using the USB port or SD card slot or take advantage of the on-board FM radio with 30 presets. Plus, there is an App-enabled control for audio and lighting functions. The included microphone with echo effect is great for karaoke. With side handles, a top telescoping handle and built-in wheels, transport is a snap.

- All-in-one high power 500-watt bi-amplified sound system
- 15″ (381mm) woofer and 1″ (2.5mm) tweeter for great sound coverage
- Woofer glows in multiple colors; lights move in dazzling circular effect to music
