Delivers long-lasting fun

### Enjoy great sound and bring the water alive with exciting lights!

Here is a totally waterproof boombox that floats upright, ensuring you'll always have your music right with you in the pool—or anywhere else! It's got 26 watts of stereo power (13 watts x 2), so your music is crystal clear. You can stream your favorite tunes wirelessly from any Bluetooth®-enabled device and control everything (play/pause, next, back) with the Bluetooth track controls. It's even got a built-in mic so you can answer your calls hands-free—no need to get out of the water. But the most amazing thing are the LED lights on the front of Triumph that illuminate the water with exciting colors for a truly special, one-of-a-kind experience. This is one versatile speaker that delivers big fun, wet or dry, indoors or out.
