RANE ONE MKII Firmware │ Release Note History

RANE ONE MKII

This document outlines the latest changes for the Rane ONE MKII.

Version: 1.2.0.2 │ Release Date: 12-16-2025

New Features

- N/A

Improvements and Fixes

- Resolved audio distortion issue where prolonged use with iOS could cause the output to sound bit-crushed or degraded.
- Improved crossfader cut-in performance for more precise and responsive transitions.
- Enhanced Stop Time behavior so it now correctly affects platter speed when the Stop button is engaged.
- Improved USB connectivity handling, ensuring proper disconnect detection even when the opposite USB port remains connected.
- Additional performance optimizations and stability improvements throughout the system.
