The Control Point button selects the USB port in control of the control strips.

In Auto mode, Loop buttons use the Scratch Live auto-loop, lighting the buttons green. In Manual mode, Loop buttons use manual looping features, lighting the buttons orange. Select knob adjusts the loop length.

Sixty-Eight Effects

FlexFx

The FlexFx Bus in the Sixty-Eight works differently than other basic effect insert solutions. The FlexFx Bus is more like an auxiliary bus that can have multiple signals assigned to it. Those combined signals can have internal effects, external analog effects and external USB effects applied in any combination. It is possible to cue and control the level of this auxiliary mix in the Main Mix. This architecture is very flexible and not at all like simply inserting an effect in a signal path and turning it on. The order of processing in the FlexFx Bus is:

1. FlexFx assign for each PGM and Mic.
2. Internal Effects
3. External Analog Insert
4. USB Insert
5. Cue
6. FlexFx On
7. FlexFx Mix Level control.

Internal Audio Effects

The six built-in effects are the Filter, Flanger, Phaser, Hold Echo, Robot, and Reverb. An exciting feature is the Sixty-Eight's ability to synchronize its internal effects to songs tagged with BPM.

External Audio Effects

Your favorite stereo effects unit, connected to the FlexFX Loop Send and Return, can be inserted independently or in combination with other effects.

USB Effects

Serato DJ includes FX powered by industry leaders iZotope, enabling you to manipulate your songs and add another dimension to your mix. Additional iZotope FX Expansion packs can be purchased to grow your arsenal of FX. Enable and control the FX in Serato DJ or Scratch Live and apply to the mix by activating the FlexFX ⟵⟶ Insert.

Rane is pleased to announce that the Sixty-Eight which previously included Serato Scratch Live software is now fully supported by Serato DJ software. DJs currently using Serato Scratch Live with supported Rane hardware have the option to migrate to the new and improved Serato DJ free of charge. If you're familiar with Scratch Live, the transition to Serato DJ is easy and intuitive.

Serato DJ provides support for DVS (digital vinyl system), iZotope FX, Sync,

Slip Mode, more Cue points, jump-to-loop, an improved 24-slot sampler and takes advantage of the high performance, ultra-low latency Rane ASIO and Core Audio drivers. Both programs share compatible song libraries, the same general workflow and deck layout.

Serato's famous Virtual Decks give you all the key track information. Easy to read BPM, time remaining/elapsed, track progress, pitch information and cue point indication are all clearly displayed.

Full color waveforms visually represent the audio frequencies. Red represents bass, green is mid-frequency and blue

represents high treble sounds. The track Overview shows you playhead location and what's coming up.

Library management of your audio and video files is a breeze. Organize your music, build crates, view previous sets and add album art. Serato DJ can also load your iTunes library. Prepare audio files for playback with auto-gain and BPM calculation.

Use keywords, genre, BPM or other rules to create Smart Crates that automatically update. Choose from multiple horizontal or vertical display modes to suit your performance style.
